

Sub: Fabrication of settlement panel and sediment trap

Ref: This office tender notification No.2022-Proc/NCSCM/Set-Panel

The responses to the queries raised by the prospective bidders along with the modification in the relevant provisions of the bid document are appended here with. The prospective bidders were requested to participate in the bidding process after careful reading and understanding of the provisions of the bid document published and possible amendment/s subsequent to the present.

Sl.No.	Queries/ Suggestions raised by the prospective bidders	Response to the Queries/ Suggestions
1	As mentioned in technical specification and drawing - Sediment trap with cylinders (Fig.1C) - What type of materials to be fabricate? Example: Fibre, Rubber, Plastic, Stainless Steel etc.	As it will be used in seawater, the cylinder should be made of non-corrosive material (such as PVC or acrylic), and the middle rod can be made of thick hollow iron pipe or iron rod that is firm enough to withstand water currents and waves.
2	As mentioned in technical specification and drawing - Fig 1b - Kindly provide the what ratio material to be used (Cement, sand, Jalli) and give the thickness of tiles.	The tiles should be 2-3cm thick. It should be primarily made of cement and sand, and if possible, iron mesh should be used to increase the sturdiness of the tiles.

**Note:** The amendment mentioned above is to be treated as amendment to the terms and conditions of the IFQ document. All other terms & conditions of the published IFQ shall remain the same.

The bidders have to submit a copy of this amendment and IFQ. Each page of the IFQ as well as along with the amendment are to be signed by the authorized Signatories of the bidders.
