

Microplastic Net

Technical Specifications

- The microplastic net should have suitable wings or lifting bodies for stable operations in shallow and calm waters (i.e. rivers, lake, estuaries, coastal waters etc.)
- The net opening will be approximately 15 x 30 cm with a suitable frame (~30x15x25 cm) and pin for Flow Meter
- The material should be of anodized aluminium or equivalent material for smooth operation in surface water.
- It should be light weight but with robust soft net buckets.
- length of net bag should be 200 cm and
- Mesh size should be 300 microns
- The microplastic net should be equipped with a mechanical Flow Meter
- The entire set up including the wings should support easy transportation or storage and should easily be unscrewed.
- The net weight of the net should be <5 kg.
- **Warranty for 1 year**
